

Concrete Breaker Model ACX-0504-MI

Specifications:

Chuck Size:

1-1/4" HX 6" CK

Bore and Stroke:

2-1/4" (57.2mm) Bore x
4 {EQ/F (1.8)}" (105mm) Stroke

Weight:

65 LBS (29.5 Kg)

Vibration:

1400 per minute

Accessories:

All Air Coupling / Fittings

In our 30 plus year in construction we have run into just about every kind of situation these tools were meant to handle. To test these tools we have used them on a variety of demolition projects. We worked these heavy breakers for hours, ripping up dozens of square feet of concrete slab. The units performed flawlessly and consistently every time with very little difference in speed. This tool is a must have for concrete removal.
